

**Amendments to the Drawings:**

The attached sheet of drawings includes changes to the drawing figure. The drawing sheet, which includes the only figure in the application, replaces the original sheet.

The labels, resistor, feedback impedance (two occurrences), control circuit, DCC circuit, and terminal pad (two occurrences) have been added.

Reference numeral 10 and the associate lead line, which appear at the top right of the figure, have been deleted.

Reference numerals 20 and 40 and their associated lead lines have been redrawn to more clearly refer to their respective amplifier and feedback impedance combinations.

Attachment:      Replacement Sheet  
                    Annotated Sheet Showing Changes

Remarks/Arguments:

This preliminary amendment is filed to present an application in proper US format and to remove multiple dependencies. The recommended subheadings have been inserted at the proper locations in the text. Minor grammatical errors resulting from the translation have been corrected. A new abstract on a separate page has been presented.

All of the changes are properly supported in the original application. No new matter is believed to have been added.

An early action on the merits of the application is solicited.

Please charge any fees that might be due with respect to Sections 1.16 and 1.17 to the Deposit Account of Lerner and Greenberg, P.A., No. 12-1099.

Respectfully submitted,

For Applicants
